

FenderFlex™

NEW multi-purpose fender

Protection for bow - stern - dock - topside

STOPS
damage!

Multi-purpose FenderFlex™

Bow - Stern – Dock – Topside

Quick to attach as a bow fender with only two lines and optional double hooks.

Brilliant for use on topsides in canals and locks.

Provides real protection from a swinging anchor.

Easy mounting on various pontoons.

Dimensions

Length:	720 mm
Width:	320 mm
Height (folded):	165 mm
Weight:	6.0 kg

Correct inflation

FenderFlex™ is already inflated at purchase and only requires this low pressure for correct operation.

If additional air becomes required, do not over-inflate and ensure that the hinge remains free to move.

For easiest inflation carefully use a compressor or the DAN-FENDER hand pump. More info at www.danfender.com

FenderFlex™ - perfect protection
Extremely cost effective compared with repairing hull damage
